CAREER OBJECTIVE

A motivated and skilled **MCA student** (pursuing) with a strong interest in **Data Analytics** and **SQL database management**. Seeking an entry-level position to leverage my analytical, technical and problem-solving skills. Eager to contribute to data-driven solutions and grow professionally in a dynamic technology environment.

EDUCATION

Master of Computer Applications (MCA)	2025 (Pursuing)
MET Bhujbal knowledge city College, Nashik	
Bachelor of Computer Applications (BCA)	2025
KTHM College, Nashik	CGPA: 6.00 (Grade B+)
HSC (12th)	2022
K.V.Naik College, Nashik	53.60%
SSC (10th)	2020
Rachana Vidyalaya School, Nashik	78.60%

TECHNICAL SKILLS

- **Programming Languages:** C++, Python
- **Database Management:** SQL
- **Data Analytics Tools:** Excel, Power BI
- **Other Tools:** Microsoft PowerPoinit

PROJECT

- **Smart Home care**

Smart Home Care System is a web-based application developed to manage home services efficiently. The main objective of this project is to reduce manual effort and improve convenience in handling daily home-related activities. The system provides a user-friendly interface for managing services in one place. This project was developed using PHP for backend development, MySQL for database management, and HTML and CSS for designing the frontend. Through this project, I gained practical knowledge of full stack development, including frontend design, backend logic, and database integration.

INTERNSHIPS Deep Learning & Full Stack Development

AI Leela | 6-month

- Built and trained basic deep learning models using Python
- Developed full stack applications using HTML, CSS, JavaScript, and backend frameworks
- Connected ML models with web interfaces for practical use
